

BNS, Inc. Acquires Sphaera, Launches BNS Networks to Expand Full Lifecycle Capabilities

Bold Step Expands Capabilities and Positions BNS at the Forefront of Infrastructure Innovation

Fort Lauderdale, FL., Aug. 5, 2025 — BNS, Inc., a strategic business, technology, and engineering services company that brings diverse expertise to solve complex challenges, today announced the acquisition of longtime strategic partner Sphaera and the formation of a new division, BNS Networks. The new division expands BNS's capabilities of complete lifecycle solutions for critical communication infrastructure aimed at telecommunications, data centers, and enterprise segments.

"This acquisition reflects a bold and deliberate step in BNS's growth strategy," said Lu Bolden, CEO of BNS, Inc. "By bringing these services fully under the BNS umbrella, we're accelerating our customers' success by increasing our ability to deliver the same high-impact solutions, only faster, leaner, and more cost-effectively. It's not just about growth. We're evolving how critical infrastructure services are delivered across IT and communications sectors."

The move builds on years of successful collaboration between BNS and Sphaera across a range of IT infrastructure projects. With growing market demand for AI infrastructure, data center support, fiber deployment, and IT lifecycle management services, the timing was ideal for BNS to integrate Sphaera's capabilities into a unified offering.

"Sphaera has delivered comprehensive IT infrastructure solutions across a portfolio of critical services that are increasingly essential to our customers' success since 2019," said Jon Billow, CEO and Co-Founder of Sphaera. "By joining forces with BNS, we can now unlock additional value for our customers by extending our capabilities and advancing our position as a world-class infrastructure services organization." Jon assumes the role of CEO of BNS Networks, and has been named Chief Revenue Officer, with a seat on the Board of Directors, at BNS, Inc.

The launch of BNS Networks complements the company's existing division, BNS Power, by rounding out the infrastructure lifecycle from electrical systems to communications networks. While BNS Power delivers mission-critical power solutions engineered for safety, reliability, and performance across defense, industrial, and infrastructure sectors, BNS Networks extends that same commitment to lifecycle leadership into the IT and communications space. Together, the two divisions provide an integrated approach to powering, connecting, and sustaining the systems customers depend on most.

This strategic expansion underscores BNS's engaged listening and unbiased approach to solving complex challenges. With deepened capabilities, unified leadership, and shared values across divisions, BNS is positioned to be at the leading edge of delivering holistic, resilient infrastructure solutions, backed by diverse expertise and driven by real-world impact.

BNS will be showcasing the services and solutions from BNS Networks and BNS Power at NCTC's The Independent Show, Aug. 10-13 in Salt Lake City, UT. To book a meeting, visit www.boldnew.com/TIS

About BNS, Inc.

BNS is a diverse strategic business, technology, and engineering services company that helps customers solve their most complex critical infrastructure challenges across the telecom, media, entertainment, utilities, and government markets.
